

Control your car by mobile phone

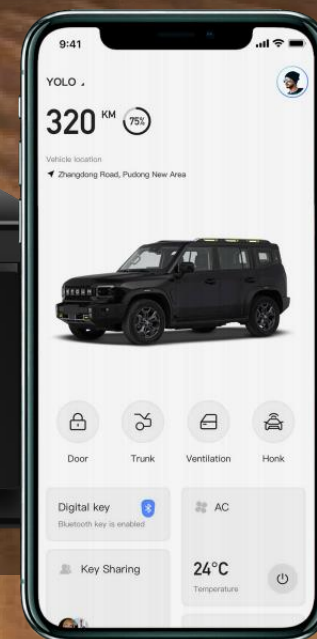

TIKA Digital key

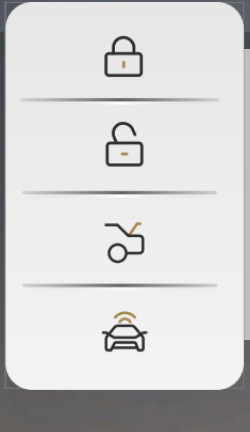

ABOUT

TIKA Digital Key is an advanced smartphone-based digital car key solution powered by cellular networks (4G/5G) and low-energy Bluetooth (BLE) technology, seamlessly integrating vehicles into the Internet of things.

The TIKA Digital Key has obtained security certifications such as CCC and ICCE and has formed a strategic partnership with Tencent Intelligent Mobility.

It ranks as a top-tier solution in China, delivering comprehensive functionality, robust security, and a seamless car ownership experience.

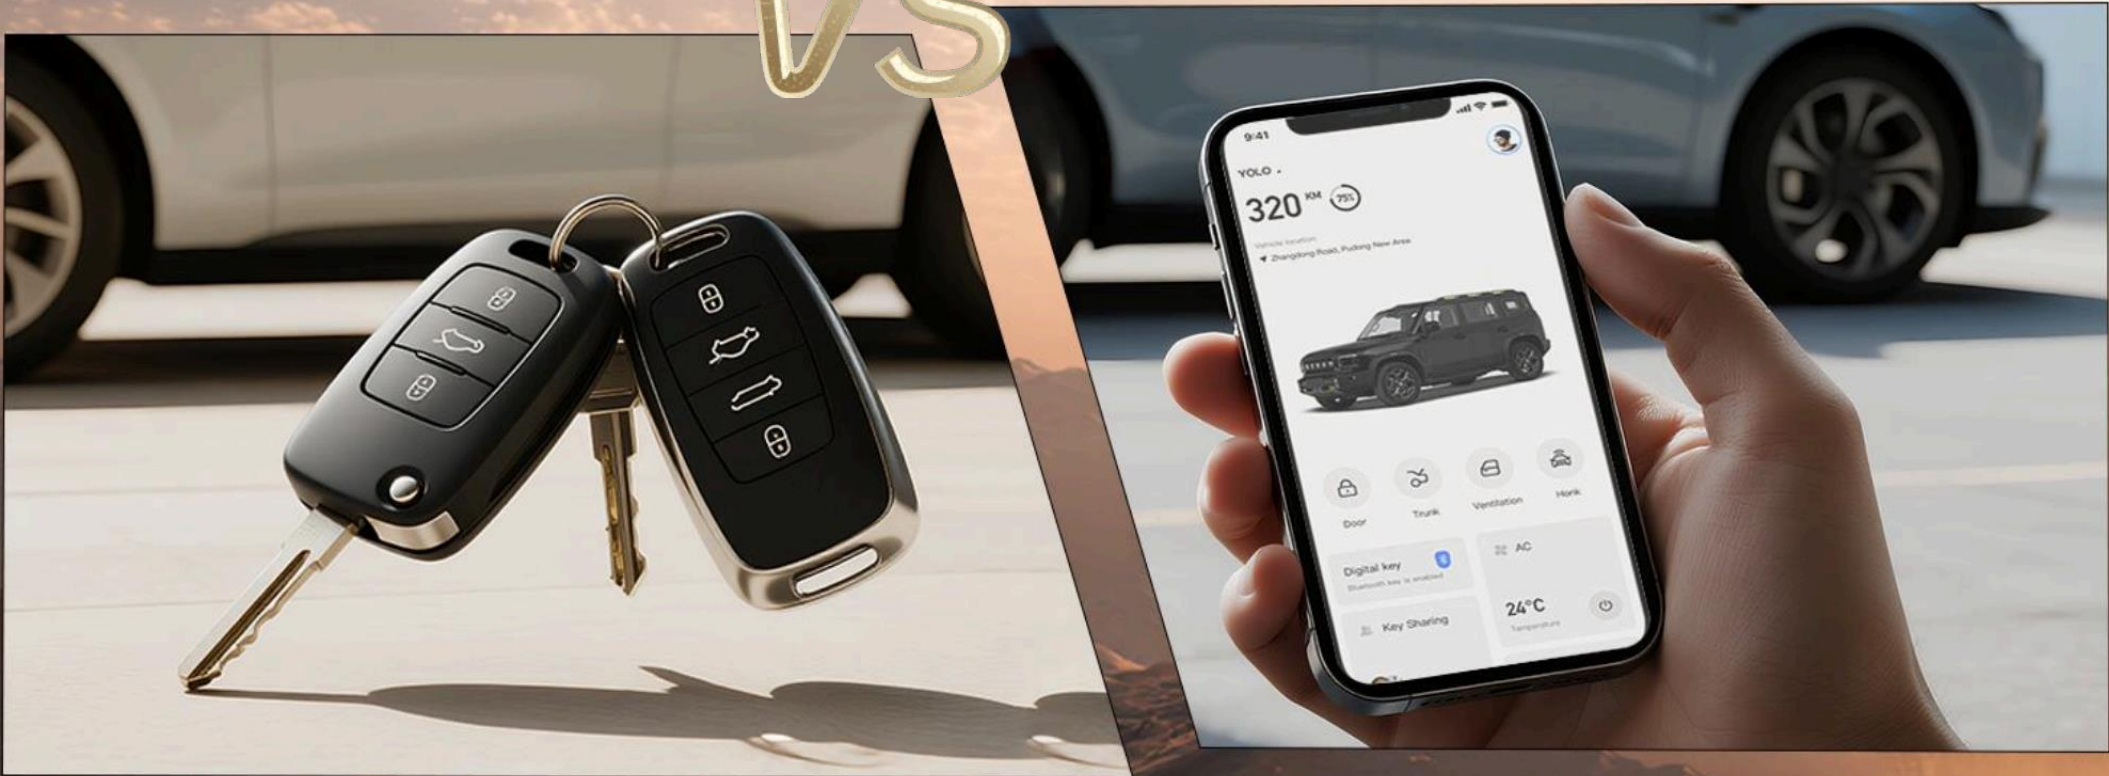

physical key

Only basic functions such as
unlocking and locking

Tika Digital key

Trusted by Customers, Backed by Local Stores

"No more hunting for keys. So easy!"

- Ali, Dubai A E

"Now my parents can drive independently."

- Layla, Doha QA

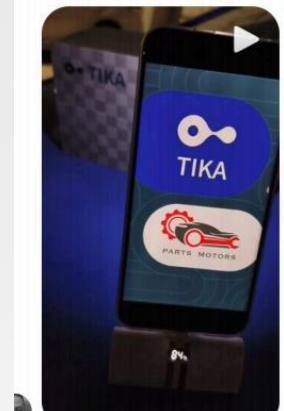

I am the first user of the device in Saudi Arabia 🇸🇦👍

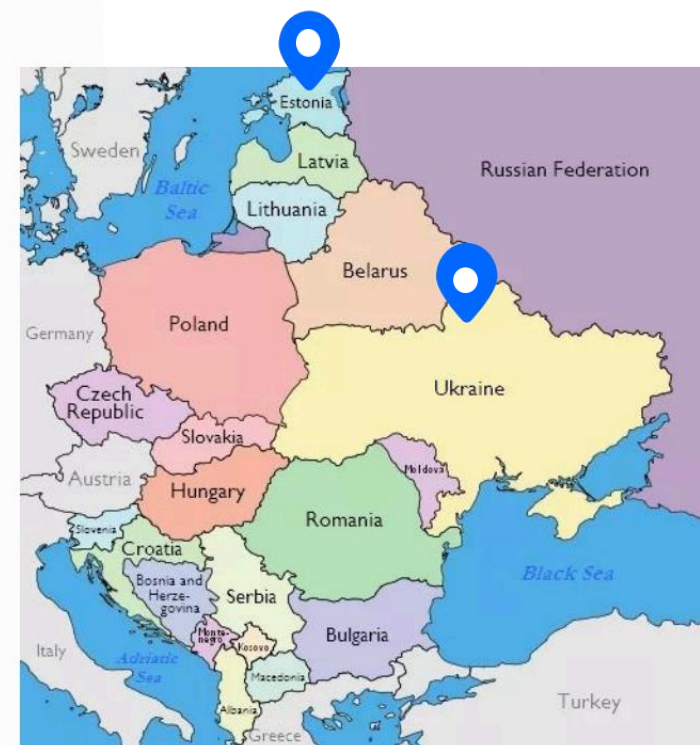

would like to sincerely thank the tika team, especially during your time in Qatar at No Signal Auto, for helping resolve the issue with my car quickly and professionally.

My name is Khaled Mohammed from Saudi Arabia, specifically from the city of Jeddah. I wanted to obtain a marketing privilege for the device, but unfortunately I do not have enough money. However, I am very proud to be one of the users of this pioneering device, and I will market it among my community of friends.

Thank you for this device, which has fantastic features and an amazing experience in terms of ease of installation and programming, as well as usage options.

MIDDLE EAST

NORTHERN EUROPE

TIKA Digital Key has been widely adopted in over 260 vehicle models worldwide.

In the international market, TIKA has established a strong presence in key Middle Eastern countries and regions, covering more than 80% of major markets including the UAE, Qatar, Kuwait, Jordan, and Oman. It is also rapidly expanding into emerging strategic regions such as Ukraine, Malaysia, and Russia, continuously strengthening its global footprint to serve more smart vehicle users around the world.
